(Build Fun & Creative Software!) (Sr.) Frontend Developer

Taiwan Mid-Level

Are you enthusiastic about transforming innovative ideas into actual products which will provide fun creative experiences for millions of people around the world? Then come and join our team!

Responsibilities

Build MVPs quickly - We are people who love to build. We build new, innovative web-based products and shape ideas into reality. It's a big plus if you have built your own projects, even small or basic ones.

Work with product people closely - Work in a collaborative environment with other cross-functional teams including Product Design, Product Management and Engineering Teams.

Have a good sense of UI/UX - Have built some web applications with good UI/UX, have worked closely with designers to iterative designs. Passionate about building and learning complex UI/UX development.

Hard Requirements

Tech Requirements:

Solid software engineering skills, proficient in HTML, CSS, and any JavaScript frameworks; understand the fundamentals of JS.

Not overly reliant on any particular front end frameworks, but able to evaluate and select different tech for best solution.

Building highly interactive applications. Web development experience with complex UI/UX and sophisticated functions in photo/video/gaming related fields.

Tech Stack

javascript, typescript, react, rxjs

node.js, npm, webpack, jest, firebase, html, css/sass

Good to have experience:

web based graphics(svg or canvas)

functional programming

Development Process

The new product group (we call Explore) works in small teams to delivers MVPs in two week cycles.

Developers frequently pair program.

All developers participate in code review. We use gitflow to manage changes.

We emphasize testing on critical sections of code, but do not require TDD.
