Company: Crypto.com

Location: Taiwan

Category: other-general

Our Product Management team drives product initiatives from inception through execution, makes impacts and launches products/features across our global footprint. We collaborate closely with engineers, designers, analysts, marketers, and other cross-functional team members to ship remarkable features and products. We are looking for Product Managers to drive product initiatives from inception through execution. This is a unique opportunity for someone with vision to architect and manage an industry-changing platform that helps change the way we deal with money. You will be able to drive impact and launch products/features across our global footprint. You will collaborate closely with engineers, designers, analysts, marketers, and other cross-functional team members to ship remarkable features and products. This position will be on the DeFi wallet and extension team, specifically looking after the web extension product and also contributing part of the time in the mobile app's development.

## **Responsibilities**

Create and maintain the team's roadmap, milestones, and dependencies with strategic priorities in mind

Define features, write product specifications, facilitate user studies, iterate on feedback, help write test plans with QA, manage the backlog, and ultimately ship products/features in a timely manner

Interview and interact with customers to build empathy, ensuring that their needs are met

Prioritize initiatives and projects appropriately and weigh tradeoffs that must be made

Perform market research and competitor related analysis

Represent the team in communication with cross-functional teams

Manage specific features within a product line or even act as a solo product owner

### **Requirements**

A data informed work style, viewed through a compassionate lens of the user

A passion for building delightful customer facing products and equipped with a keen observation of the Web3 industry trends Experience (at least 4 years) shipping and iterating on successful Software products at scale

Demonstrated leadership, taking initiative and producing results

The ability to collaborate well with designers, engineers, QA, Marketing, compliance, growth

Bachelor's degree or equivalent experience

With domain knowledge in Defi, blockchain, NFTs, Web 3 are preferred (Either as a user or work in Web3 company)

With web extension products' working experiences are preferred

Bring humility to your work and how you work with others
