

Anti-Virus Research Scientist/Engineer - Taipei

[Apply Now](#)

Company: Fortinet

Location: Taiwan

Category: other-general

Location: Taiwan (Taipei)

Role Overview:

Fortinet Taiwan is currently recruiting for our Anti-Virus Research Scientist/Engineer team in Taipei. Suitable candidates should have an appetite for learning botnets, viruses, and other malicious software analysis techniques to make the world a safer place. In this role, you will build your malware knowledge and reverse engineer different types of malware – file infectors, network worms, Trojans, backdoors, rootkits, etc.

Responsibilities:

Virus/malware replication and analysis.

Analyze customers' inquiries and submissions of virus/malware.

Develop virus/malware detection algorithms in proprietary description language.

Write descriptions of virus/malware for publication on Fortinet's website.

Develop programs/scripts for virus/malware analysis and replication.

Requirements:

Diploma of Technology or Bachelor of Science Degree in Computer Science or Electrical/Computer Engineering.

Experience and understanding of software programming (C/C++).

Experience and understanding of Intel x86 assembly language is an asset.

Experience with scripting languages (Python, Perl, JavaScript, VBS, Linux Shell) is an asset.

Fast learner with a good attitude and team player spirit.

Proven analytical and problem solving skills.

Proficient in verbal and written English language.
