Company: Michael Page

Location: Taiwan

Category: other-general

About Our Client

My client is a robotics product company with strong performance.

Job Description

Evaluate, test, and optimize various sensor hardware (Sensor Fusion) required for the company's products, including depth vision, temperature sensors, motion capture, etc.

Collaborate closely with the software team to ensure seamless integration between sensors and software.

Participate in the development of communication protocols between hardware and software, ensuring efficient data transmission.

Coordinate and integrate the work of the hardware development team into the company's products.

The Successful Applicant

Bachelor's degree or higher, majoring in Electrical Engineering, Electronic Engineering, Hardware, or related fields in Computer Science.

Extensive experience in hardware development, particularly in sensor integration.

Familiar with the hardware operation principles of sensors, including but not limited to vision, temperature, Motion Capture, etc.

Proficient in communication protocols to ensure seamless collaboration between hardware and software.

Strong teamwork and communication skills, able to collaborate closely with software development teams.

Ability to solve complex problems and a passionate approach to hardware development.

Plus:

Experience in the field of robotics.

Familiarity with embedded systems development.

Proficiency in embedded application development and experience integrating with ROS.

Understanding of hardware technologies related to computer vision.

Ability to independently solve problems and demonstrate innovative thinking.
