

Intern 2024 - TDT PHOTO Data scientist

[Apply Now](#)

Company: Micron

Location: Taiwan

Category: other-general

Our vision is to transform how the world uses information to enrich life for all.

Micron Technology is a world leader in innovating memory and storage solutions that accelerate the transformation of information into intelligence, inspiring the world to learn, communicate and advance faster than ever.

JR46197 Intern 2024 - TDT PHOTO Data scientist

Our vision is to transform how the world uses information to enrich life for all. Micron Technology is a world leader in innovating memory and storage solutions that accelerate the transformation of information into intelligence, inspiring the world to learn, communicate and advance faster than ever.

As a Data Science Engineer at Micron, you'll make value of data and build practical intelligent applications. You will have the chance to define an innovative system which translates business requirements to a workable solution with required data science methods embedded. You'll partner with experienced developers to enable user friendly web UIs and APIs. By collaborating with multi-functional teams, like customers, data scientists, machine learning engineers, and data engineers, you'll learn critical domain knowledges as well as basic concepts of ML/DL algorithms and system integration requirements. We expect intern has decent programming skills, is interested in self-learning new techniques, and is passionate about solving the practical problem. We're seeking any talent who has strong motivation of growing a career as a full stack AI solution provider.

Responsibilities:

Build/Maintain modern and scalable web applications.

Collaborate with backend developers to define API spec, as well as API's development and enhancement.

Understand new requirements and support the feasibility study. Propose the UI prototype and conduct wireframes.

Qualifications & Skills:

Familiar with Javascript/Typescript, Python, C#

Basic knowledge of UI/UX and prototype designing

Hands on experience on REST APIs using Express/Flask/.Net

Ability to extract data from different databases via SQL and other query languages.

Fluent in English communication.

Education and Experience:

Master's degree in any field that have worked on data analysis relative projects.

At least two years of experience in developing web applications (Angular preferred)

Strong troubleshooting, problem analytics and debugging capabilities.

Experience with applying data cleansing, outlier identification, and missing data techniques are a plus.
