Company: ASML

Location: Linkou District

Category: other-general

Introduction to the job

Our vision is providing a smart working area, do factory operation software application integration and roll-out for continuous process improvement.

Role and responsibilities

Engage with stakeholders proactively to learn internal customer wish needs.

Understand and analyze user requirements, prepare requirements document, as-is & to-be processes and identify gaps.

Design processes to meet requirements, prepare functional specifications. Prepare test plans, conduct testing validation, and support user acceptance testing (UAT). Communicate application and project status and vision to stakeholders in a timely manner.

Responsible for supporting all other enterprise level applications such as SAP.

Responsible as a key resource in cross-functional projects to develop and implement new applications for the business functions.

Represent project team in global workshop/meeting to influence process design and decision making.

Education and experience

Master with major in Industrial Engineering or Management related fields

6+ years working experience with hands-on and management in Continuous Improvement categories

Experience with factory operations and logistics is a prefer

Skills

Working at the cutting edge of tech, you'll always have new challenges and new problems to solve – and working together is the only way to do that. You won't work in a silo. Instead, you'll be part of a creative, dynamic work environment where you'll collaborate with supportive colleagues. There is always space for creative and unique points of view. You'll have the flexibility and trust to choose how best to tackle tasks and solve problems.

To thrive in this job, you'll need the following skills:

Demonstrated project leadership, good command of project management, and facilitation skills

Programing skills (for example: VBA, C#, python etc.)

Good team player able to influence without power

Cross-functional communication and global project experience?

Courageous to challenge and proactively to give and seek constructive feedback

project management skills, SAP hands-on, MES hands-on experience and systematic thinking

Able to give presentations fluently in English and Mandarin

Familiarity with continuous improvement methodologies and quality management is a plus.

Application of Power BI is a plus
