Company: Michael Page

Location: Taiwan

Category: other-general

About Our Client

A leading innovator dedicated to improving global business and finance through blockchain solutions. With a team of experts in blockchain, cryptography, software development, and finance, they develop innovative solutions to address trust, transparency, and efficiency issues in existing systems. Their impact in the blockchain field is significant, positioning them as key players in driving the digital revolution.

Job Description

Create and construct libraries and frameworks to bolster intricate web applications, enhancing development speed and elevating code standards.

Enhance web applications for peak performance and scalability.

Lead architectural and technical design, development, and optimization efforts.

Guarantee system stability, security, and user satisfaction.

Formulate, define, and assess complex frontend projects and enhancements.

Engage in collaborative product development with various teams.

Promote team-wide enhancement opportunities and advocate for best practices.

The Successful Applicant

Minimum of 2 years of experience in blockchain software development.

Experience of 5+ years in constructing responsive web applications using React and JavaScript/TypeScript.

Comprehensive understanding of Web performance optimization and error monitoring.

Exceptional problem-solving and analytical skills, with familiarity with various design patterns.

Proficiency in writing structured and clean code.

Experience with Micro Frontend Management, proficiency in mono-repo tools, and expertise in CI/CD pipelines is desirable.
